Bins, Trays & Frames

Axjo is a global expert in sustainable packaging solutions made from recycled polymer materials. We manufacture cable reels and storage solutions that are integrated into our circular return system from the very beginning.

With headquarters in Gislaved and operations worldwide, we develop resource-efficient flows that reduce unnecessary waste.

Through innovation and experience since 1945, we create solutions made to last, driving a sustainable industry built for tomorrow.

Global production.
Sustainable performance.

Axjo Group combines decades of experience with innovative solutions for efficient storage and logistics. With production facilities in Sweden and the United States as well as strategically located hubs across Europe, we provide reliable service and maintain strong customer relationships.
Our extensive product range includes bins, trays and frames developed to maximize storage space and simplify material handling. These solutions support modern warehouse operations and automated logistics systems.
Through smart product design and sustainable materials backed by extensive industry expertise, Axjo delivers durable and flexible solutions that meet the evolving demands of modern storage and logistics.

Storage Bins

Axjo storage bins are designed to meet industry standards. Made from 100% recycled polymer, they save 88% CO_2 compared to virgin material while offering a simple, flexible, and reliable storage solution.

Product highlights:

- Made from 100% recycled polymer
- Open front
- Available in standard sizes
- Interstacks with other leading brands

Compact Bins

Axjo Compact Bins are produced in Sweden. Made from 100% recycled polymer, they save 88% CO_2 compared to virgin material while meeting industry standards for versatile and reliable storage solutions. Designed with shelf-adapted dimensions, an integrated drawer stop, and a stackable design, they provide a flexible and space-efficient solution for organized storage.

Product highlights:

- Made from 100% recycled polymer
- Integrated drawer stop
- Nestable to minimize packing volume

ReFlex

Axjo ReFlex is produced in Sweden from 100% recycled polymer and reduces CO_2 emissions by 88% compared to virgin material. Its foldable design saves space and transport volume while improving handling and ergonomics. ReFlex also streamlines internal material flows and enables suppliers to pack directly into the bins, reducing packaging waste and costs while creating a cleaner working environment.

Product highlights:

- Made for 100% recycled polymer
- Foldable design
- Easier handling and improved ergonomics

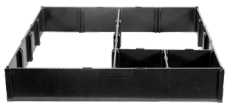
VLM Frame System

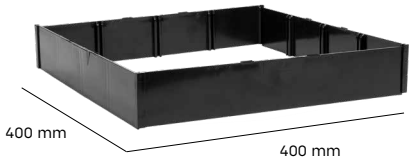
Axjo VLM frame systems are designed to optimize tray utilization in vertical storage lifts. Made from 100% recycled polymer, they save 88% CO_2 compared to virgin material while offering efficient, adaptable solutions with customizable divider options.

The frame consists of four parts that form a 400x400 mm frame.



Three sizes of dividers creates spaces from 100x100 mm to 400x400 mm.

The height of the frame is 70 mm. By stacking multiple frames on each other, you can create heights of 70, 140, 210 mm, for example.



Use the locking pins to lock two sections of the frame system.

To connect several frames next to each other, use a locking cross.

Our assortment made for AutoStore

Smart Storage stars with smart solutions. Our AutoStore compatible BINs are designed for precision, efficiency, and long-lasting performance, all made from recycled materials.

AutoStore BIN

At the forefront of sustainability and efficiency, we offer the Nordic region's most eco-friendly production, powered by a smart energy mix and a deep commitment to sustainability.
Need a seamless supply of AutoStore BINs? We deliver fast, precisely, and hassle-free. Our dedicated on-site service ensures smooth system refilling whenever you need it.
We know time is critical. That's why our pallets are packed for efficiency, minimizing waste and streamlining the unpacking process so you can integrate large volumes faster and with less effort.
From the moment you place your order to the final integration, we're more than just a supplier, we're your trusted partner.

- Sustainable Production
- Optimized Packaging for faster integration
- Reliable, on-site service
- Precision deliveries, every time
- Shorter transports within Scandinavia
- Sweden is the country with the lowest CO_2 footprint in production
- Only producer in the Nordic of AutoStore BINs

AutoStore BIN accessories

ReFlex Divider

Axjo AS Bin Dividers are designed to optimize storage within AutoStore Bins. Produced in Sweden from 100% recycled polymer, they reduce CO_2 emissions by 88% compared to virgin material. By combining long and short dividers, you can create flexible compartments with up to 32 sections in a single bin to maximize storage efficiency. The durable plastic design also offers a longer lifespan and reduces dust for a cleaner working environment.

112514131040

Product highlights:

- Made for 100% recycled durable ABS
- Tightly secures the bin
- Can easily be repositioned

Art. No	Description	Size	Qty/ Pallet	Qty/ Cartoon

112514131040	Divider short AutoStore 330	414 x 8,5 x 310 mm	1362	227

ReFlex

Made from 100% recycled material, ReFlex optimizes your AutoStore flow both inbound and outbound. Designed to fit perfectly in an AutoStore 330 BIN, it ensures a smooth and efficient handling process. Using ReFlex inner bins at picking and packing reduces handling outside the grid and enables a full phase-out of cardboard by letting suppliers pack directly into ReFlex, cutting waste, fees, and dust. With a patent-pending design, ReFlex is a sustainable and future-proof solution for modern logistics.

Product highlights:

- Made from 100% recycled polymer
- Height made for 330 BIN
- Support to eliminate vibration and rattling
- Grips for robot handling

ReFlex Grip

Axjo ReFlex Grips are designed to enable safe and ergonomic lifting of ReFlex bins from AutoStore BINs. With a focus on workplace safety, they improve handling and reduce the risk of pinched fingers and improper lifting.

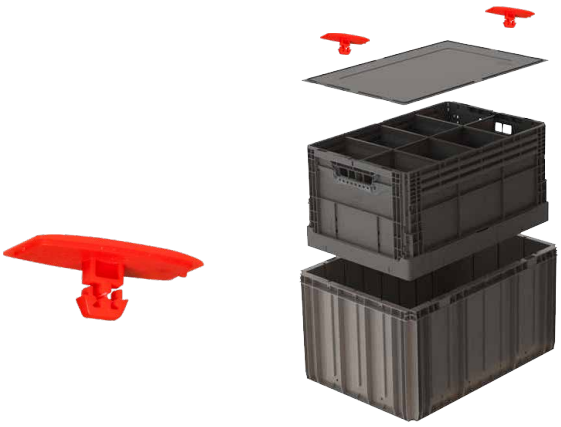
Product highlights:

- Safe and ergonomic handling
- Reduced risk of workplace injuries

Art. No	Description	MOQ
4983601020	ReFlex Grip	50 pcs

ReFlex Clip

Axjo ReFlex Clips are designed to seal and secure the lid to the ReFlex bin, keeping goods safely protected during handling and transport. The clips are easy to remove with a simple twist, allowing quick and convenient access to the goods.



Product highlights:

- Secure lid sealing
- Safe and protected goods
- Easy twist removal

Made in Europe

We have production and operations in several countries around the world, with sustainability as a key part of our business. Manufacturing requires a lot of energy, and we are aware of the impact this has. That's why we work continuously to reduce our emissions.
We do this by installing solar panels, improving how our machines run, and making our processes more efficient to reduce unnecessary waste.

Below, you can see how emissions differ between the countries where we operate. In Europe, and especially in Sweden, emission levels are already relatively low. This is partly because the country uses a mix of energy sources, including a large share of renewable energy.
We know that different countries have different conditions. Our goal is always to do what we can to reduce our impact, wherever we operate.

Sweden

0,03

kg CO_2-eq /kwh

Germany

0,42

kg CO_2-eq /kwh

We integrate sustainability at every step

In every decision, we consider the bigger picture and take responsibility for both present and future needs.

Environmental

We are aware that our operations impact the environment, both locally and globally. Therefore, we work every day to reduce resource use and waste. Our products are made from 100% recycled material, can be reused multiple times and recycled again, contributing to environmental sustainability.

Social

Our success is built on our ability to create value for our customers, suppliers, and employees, as well as for local community organizations and charities. Through an inclusive and responsible business approach, we aim to contribute to more job opportunities.

Economic

For us, economic growth is about more than numbers. It is about building a long-term business where development, new establishments, and smart investments create value over time. In this way, we aim to contribute to a sustainable economy for ourselves and for the society we are part of.

Recycled plastic

All our packaging solutions are made from 100% recycled plastic. Working with recycled materials has been at the core of our business for many years and is now part of our DNA.

Compared to traditional virgin plastics, recycled plastic offers both environmental and practical advantages. It is not only a more sustainable choice, but also an area where our experience and expertise truly stand out.

Recycled plastic is what we do best and the foundation of our business.

Powered by Greenology®

Greenology® is Axjo's platform for sustainable material innovation. With strong expertise in recycled plastics and dedicated in-house R&D, we continuously improve how recycled materials are processed. Our technology transforms low-grade plastic waste into high-performance materials suitable for demanding industrial applications.

We work closely with partners in Europe and the United States to further improve material quality and product performance.

At Axjo Group we believe upcycling is the new recycling. It is not enough to reuse materials. We enhance them. By refining polymer waste into engineered compounds we create stronger materials and reduce environmental impact.

Through continuous development and strong partnerships we lower our footprint and help our customers lower theirs.

EPD

– Transparency that Creates Business value.

Documented environmental performance for smarter business decisions.

At Axjo Europe AB, we actively work to provide our customers with clear and verified information about the environmental impact of our products. Through Environmental Product Declarations (EPDs), we offer transparent, third-party verified environmental data for our cable reels and box systems. An EPD is based on a Life Cycle Assessment (LCA) and presents a product's environmental impact from raw material extraction and production to use and end-of-life recycling.

For you as a customer, this means:

- Fact-based support in procurement processes
- Reliable input for your own sustainability reporting
- Clear documentation for environmental requirements and certifications
- The ability to compare alternatives on equal terms

WHEN YOU CHOOSE AXJO, YOU DO NOT ONLY GET A PRODUCT – YOU GET DOCUMENTED PERFORMANCE.
