

# AutoStore BINs

- Produced by us, optimized for you!

# AutoStore BIN

As a partner we can provide AutoStore's fully automated Cube Storage System with the BINs solutions manufactured locally at our state-of-the-art facility in Sweden. While our reach is global, our primary focus lies within the Nordic market, focusing on good quality products with sustainable accessories. With years of

experience in polymer materials and in-house compounding of polymers, we can provide high-tech BINs for all needs.

2 more sizes are available:

220 mm

425 mm

330 mm

## Fast. Tailored. Reliable.

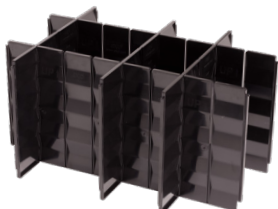

At Axjo, we bring extensive experience in working with polymer materials. Our dedication to continuous development and a focus on quality, service, and materials are evident through our internal expertise and confirmed by our customers. We always strive to provide our customers with the best

possible products, tailored to their specific needs, delivered on time, and with minimized transportation distances. Our Greenology Lab, R&D Center, and Tech Center enable us to transform ideas into final products quickly while maintaining an unwavering commitment to quality and sustainability.

## Dividers for AutoStore

As the only manufacturer of AutoStore BINs in the Nordics, we provide customized solutions tailored to your system. Our offering also includes accessories made from 100% recycled materials. With Swedish-made AutoStore BINs,

sustainable accessories crafted from recycled materials, and a perfect fit for the AutoStore system, we ensure efficient logistics and innovative accessories designed to meet your needs.

100% recycled  
ABS - 80% lower  
CO<sub>2</sub> footprint

Best long-term  
economical  
solution

Will last as  
long as the  
BIN-guaranteed

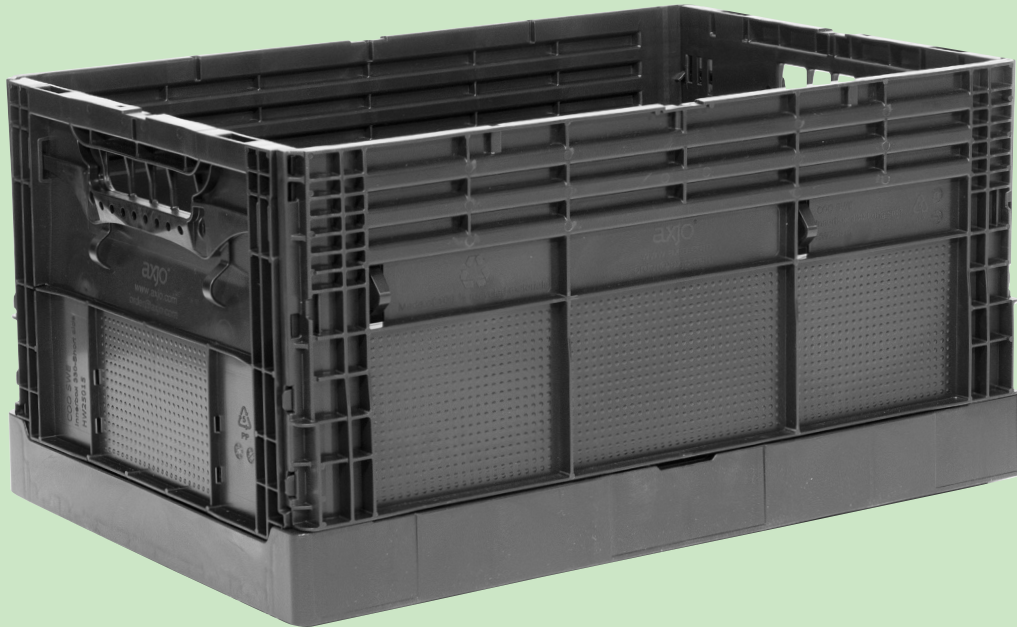

Locks in place  
and holds the  
sides together

# ReFlex 330

## Speed up your AutoStore inbound logistics

ReFlex 330 is a unique collapsible inner bin specially designed for the AutoStore 330 BIN. It helps you speed up your inbound, eliminate scrap and dust, and achieve a more sustainable solution.

<b>Ext. height</b>	305/300	<b>Nesting ratio</b>	80%
<b>Int. height</b>	293	<b>Internal useable height</b>	293 mm
<b>External top</b>	600 x 400 mm	<b>Stacking pitch</b>	300 mm
<b>External base</b>	600 x 400 mm	<b>Capacity</b>	61 L
<b>Internal top</b>	564 x 367 mm	<b>Weight (base + arms)</b>	2,9 kg
<b>Internal base</b>	564 x 367 mm	<b>Payload</b>	27 kg
<b>Nesting pitch</b>	59 mm	<b>Stacking load</b>	270 kg

Stacked 148 pcs on 120/80 pallet or 185 pcs on 120/100 pallet.

**PERFECT HEIGHT**  
 Perfectly designed for use with or without the lid, adaptable to any setup. One crate. Endless flexibility.

**SPACE-EFFICIENT**  
 With an 80% nesting ratio, it saves valuable storage and transport space. Save space. Save cost. Boost efficiency.

**GENEROUS CAPACITY**  
 A full 61 litres of optimized volume for maximum load efficiency. More capacity. Same footprint.

**SILENT AND STABLE**  
 Smart bottom supports eliminate rattling and movement during handling. Quiet strength. Smooth performance.

**NO VOLUME LOSS**  
 Same dimensions at base and top, every litre counts, even with pre-packed products. 100% usable volume, zero waste.

**STACKABLE AND SECURE**  
 Engineered for safe stacking, maximizing space in storage and transport. Stack smart. Store more.

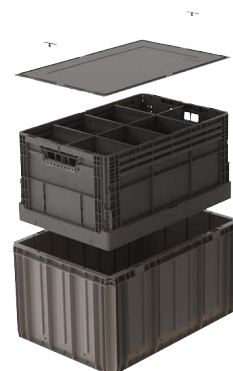

## ReFlex accessories

Injectionmoulded dividers for fractions to 1/8.

Sealable lid for ReFlex. Sealed with securitylock or strapping. Loose lids stack on top of folded ReFlex.

Complete system.

## **A sustainable vision for a better tomorrow**

Our ambition is to work towards becoming a zero-waste company by embedding sustainability into every aspect of our operations. We are dedicated to minimizing waste, optimizing resources, and implementing environmentally friendly practices, all while maintaining a strong focus on innovation, quality, and ethical business standards.
